Icing Sugar

Icing Sugar · Powdered sugar milled from white or refined sugar · Origin: Thailand

As published at anutida.com/sugar/icing-sugar/powdered-icing-sugar/ · updated 6 October 2026

Specification

Parameter	Limit	Basis
Product type	Powdered sugar milled from white or refined sugar	
Colour — Codex powdered sugar Codex CXS 212 annex value — for voluntary use between trading partners (2001-amended text)	max. 60 IU	Official specification
Conductivity ash — Codex powdered sugar Codex CXS 212 annex value — for voluntary use between trading partners (2001-amended text)	max. 0.04 % m/m	Official specification
Invert sugar — Codex powdered sugar Codex CXS 212 annex value — for voluntary use between trading partners (2001-amended text)	max. 0.04 % m/m	Official specification
Starch — Codex powdered sugar Codex CXS 212 annex value — for voluntary use between trading partners (2001-amended text)	max. 5.0 % m/m	Official specification
Anticaking agents where no starch is used — Codex Codex CXS 212 additive provision in the 2001 text; later amendments may have moved additive limits to the GSFA — confirm the limit in your contract	max. 1.5 % m/m	Official specification
Sulphur dioxide — Codex powdered sugar Codex CXS 212 additive provision in the 2001 text; later amendments may have moved additive limits to the GSFA — confirm the limit in your contract	max. 15 mg/kg	Official specification
Anticaking agent — Thai retail icing sugar (Mitr Phol)	Tapioca starch	Producer specification
Polarisation — Thai producer industrial icing sugar (TRR)	min. 95°	Producer specification
Average particle size — Thai producer industrial icing sugar (TRR)	75–106 µm	Producer specification
Fineness — India IS 1152:2003 (reference)	min. 98 % through 150 µm; min. 75 % through 75 µm	Official specification
Origin	Thailand	

Notes

Codex rows are voluntary reference values for powdered sugar from the 2001-amended text; Codex's loss-on-drying value does not apply to icing sugar with added starch. TIS 755-2565 is the Thai standard; its limits are in the paid standard and are not reproduced here. Producer rows are Thai producers' published figures, and the IS 1152 row is a published fineness reference. The specification of your lot is confirmed on its certificate of analysis.

Limits are shown with their basis: an official specification, exchange contract terms or a producer's published

specification. Each lot's actual values are reported on its Certificate of Analysis, issued with every lot.

Packaging: 25 kg bags. The format for your order is confirmed in the quotation.

To confirm the current specification for your order, request a quotation at anutida.com/request-quote/ or email sales@anutida.com.
