As published at anutida.com/sugar/specialty-sugar/organic-cane-sugar/ · updated 6 October 2026

Specification

Parameter	Limit	Basis
Product type	Certified organic cane sugar	
Organic certification — Thai producer (Wangkanai) As stated by the producer; request the current certificate and its scope	EU organic (page cites EEC Reg. 834/2007), USDA-NOP and JAS; certifier Bioagricert (Italy)	Producer specification
Polarisation floor — Thai special-type sugar class (OCSB) Class floor only; organic sugars are listed in OCSB's special-type sugar sheet	min. 60.00 °Z, or total sugars min. 70	Official specification
Organic sugar types recorded by OCSB (2025/26)	Organic sugar; premium organic sugar; organic brown sugar; organic cane sugar	
Origin	Thailand	

Notes

Organic status rests on the producer's certificate, stated here as the producer declares it. The OCSB rows record the legal class floor and the organic sugar types reported in 2025/26. Colour, pol and moisture are agreed per contract and confirmed on the lot's certificate of analysis.

Limits are shown with their basis: an official specification, exchange contract terms or a producer's published specification. Each lot's actual values are reported on its Certificate of Analysis, issued with every lot.

Packaging: 1 kg consumer packs. The format for your order is confirmed in the quotation.

To confirm the current specification for your order, request a quotation at anutida.com/request-quote/ or email sales@anutida.com.
