# Fine-Grain Caster Sugar

Specialty Sugar · Fine-grain white or refined cane sugar · Origin: Thailand

As published at anutida.com/sugar/specialty-sugar/fine-grain-caster-sugar/ · updated 6 October 2026

## Specification

| Parameter | Limit | Basis |
|---|---|---|
| **Product type** | Fine-grain white or refined cane sugar | |
| **Particle size — Thai producer fast-dissolving sugar (TRR)** | max. 0.40 mm | Producer specification |
| **Colour — Thai producer fast-dissolving sugar (TRR)** | 35–60 IU | Producer specification |
| **Polarisation — Thai producer fast-dissolving sugar (TRR)** | min. 99.80° | Producer specification |
| **Moisture — Thai producer fast-dissolving sugar (TRR)** | max. 0.04 % | Producer specification |
| **Grain-size classes — European producer reference (mean aperture)** | Extra fine 0.20–0.40 mm; fine 0.40–0.65 mm; standard 0.40–1.00 mm | Typical value |
| **Origin** | Thailand | |

## Caster refined sugar

| Parameter | Limit | Basis |
|---|---|---|
| **Average grain — caster refined sugar (TRR)** | < 0.4 mm | Producer specification |
| **Colour — caster refined sugar (TRR)** | max. 45 IU | Producer specification |
| **Polarisation — caster refined sugar (TRR)** | min. 99.80 °Z | Producer specification |

## Caster white sugar

| Parameter | Limit | Basis |
|---|---|---|
| **Average grain — caster white sugar (TRR)** | < 0.4 mm | Producer specification |
| **Colour — caster white sugar (TRR)** | max. 100 IU | Producer specification |
| **Polarisation — caster white sugar (TRR)** | min. 99.70 °Z | Producer specification |

## Notes

There is no standard definition of caster sugar. Rows show a Thai producer's published fast-dissolving sugar and, for comparison, a European producer's grain-size classes. Variant tables give the producer's caster refined and caster white specifications. Grain size, colour and pol for your order are fixed in the contract and confirmed on the certificate of analysis.

Limits are shown with their basis: an official specification, exchange contract terms or a producer's published specification. Each lot's actual values are reported on its Certificate of Analysis, issued with every lot.

Packaging: 25 kg bags, 1 kg consumer packs. The format for your order is confirmed in the quotation.

To confirm the current specification for your order, request a quotation at anutida.com/request-quote/ or email sales@anutida.com.
